

Maxwell Anders Frederickson

STAFF SOFTWARE ENGINEER

maxwell@frederickson.io · Remote, US

SUMMARY

Staff Software Engineer and Technical Lead at Apple with fourteen years at the company and nine years building full-stack Ruby on Rails platforms and RESTful APIs. Sets architecture and engineering standards for a large developer organization spanning dozens of internal services. Owns AppleCare's career development platform and a high-volume Rails content delivery service. Builds production LLM agents and MCP servers, and led the team's adoption of AI development tooling.

TECHNICAL SKILLS

Languages Ruby, JavaScript, Python, SQL, HTML5, CSS/SCSS, Java, Swift, Shell

Frameworks & Web Ruby on Rails, Hotwire (Turbo/Stimulus), RESTful API design, Full Stack Web Development, Bootstrap, Pundit, RSpec, Test- and Behavior-Driven Development

Data PostgreSQL, Snowflake, Teradata, Data Warehousing, ETL pipelines, Splunk

Infrastructure Docker, Kubernetes, Linux, UNIX, CI/CD, Git, Networking, OAuth 2.0, SSO/identity integration

AI Engineering Claude Code, Model Context Protocol (MCP), LLM agent design, RubyLLM, agentic workflows

Practice Agile, Project Management, technical leadership, code review, mentorship, technical documentation

EXPERIENCE

Apple · Remote

Staff Software Engineer / Technical Lead

Nov 2021 – Present

- Own AppleCare's career development platform and its built-in AI career assistant, from data model through production operation.
- Own a high-volume Rails content delivery service running across multiple regions.
- Technical lead for a large engineering organization, setting architecture direction, code review standards, and release practice across dozens of internal Rails services and APIs.
- Built a package discovery and indexing platform serving multiple language ecosystems, and modernized a large Rails front end onto Turbo, Stimulus, and Bootstrap, with authorization on Pundit.
- Delivered production LLM systems: MCP servers with OAuth 2.0 discovery and session management, conversational assistants embedded in internal web applications, and an autonomous agent that triages engineering tickets by reading discussion context and filling in records as information arrives.
- Made Claude Code standard practice across the organization through shared repository conventions, tooling, and agent guardrails, and keep dozens of repositories current on Rails and Ruby major versions, dependency and vulnerability patching, RuboCop, and test coverage.
- Mentor and onboard engineers through 1:1s, pair programming, and design review, reviewing pull requests and writing technical documentation.

Feb 2017 – Nov 2021

Software Engineer / Senior Software Engineer

- Designed and delivered full-stack Ruby on Rails applications and RESTful APIs for AppleCare, including a call-center quality calibration platform and a vendor change-management system, both still in production today.
- Was lead developer and architect on several of these services, responsible for schema design, Kubernetes deployment, and production support.
- Built data pipelines and warehouse integrations across Teradata, PostgreSQL, and Snowflake, with monitoring and alerting in Splunk.
- Standardized the organization's containerized base images (RHEL and Debian, Ruby and PHP) and practiced test- and behavior-driven development with CI/CD pipelines across Linux/UNIX servers and Kubernetes namespaces.

Apr 2012 – Feb 2017

AppleCare Technical Support / Internet Services Senior Specialist

- Team liaison between Tier 2 support and Site Support Engineering, and Global Lead Collaboration Curator for iTunes Store issues. Represented iTunes management on high-profile escalations involving hijacked accounts, billing disputes, and fraud.
- Ran at least eight one-on-one coaching sessions a week, and performed hardware installation, diagnosis, and repair across the Apple product line.

CERTIFICATIONS**CompTIA Project+ Certified Technician**

Mar 2018

No expiration

CIW Site Development Associate, Certified HTML5 / CSS3 Web Developer

Jul 2017
